

Learn the rules for single

<https://www.youtube.com/watch?v=ynqtzvw3O5s>

In this video, you will learn the rules for single.

Single is played between 2 opponents who hit the shuttle with their rackets over and across the net, until it falls on the ground.

The single court includes the back tramlines and excludes the side tramlines.

Each player has 2 service parties. The height of the net is 5 feet or a 155 cm.

The rally starts with the service and ends when the shuttle falls on the ground or out of the single court.

A match consists of the best of 3 games of 21 points. Everytime a service is played, a point is scored.

The person who wins the rally adds a point to his score. When the game is tied at 20 points each the person who gains a 2 points lead first, wins that game. When the game is tied 29 points each, the person who scores the 30th points first wins the game.

After the game is over, sides are switched, and the person who has won the game serves first.

In the third game, when a player reaches 11 points, sides are switched.
